

# Armorplate™

**Armorplate** is a direct-pressure laminate dieboard that utilizes a strong, multi-layer Finnish Birch veneer and thermally-fused melamine micro-laminates.

The micro-laminates are heat-pressed on both surfaces to improve the hardness and prevent moisture migration. These laminates provide flatness, strength and stability.

Armorplate offers precise laser cutting results, excellent dimensional stability, and firm “grippy” knife holding for your most demanding diecutting, stripping and blanking applications.

## ARMORPLATE BENEFITS

- Strong multi-layer Finish Birch veneer
- Heat-pressed micro-laminates for stability
- Precise laser cutting abilities
- More cost-effective than traditional Hard Rock Maple

AVAILABLE IN  
WHITE AND GRAY
