

## FLEXIVEIL

Flexiveil is the most advanced veil in the market. It was specifically designed to handle the demands of complex curves. The ability to bend and drape in more than one direction makes Flexiveil unique. It handles compound curves in pre-form, press, vacuum, and injection molds, plus other resin-transfer systems. As with all our products, this continuous strand veil is made of corrosion-resistant A-glass, and has excellent wet-out abilities for your Class "A" surfacing needs.

Available binders include: polyester, special polyester blend for pre-forming, epoxy-compatible, and phenolic.

### Vacuum Molding

## FLEXIVEIL 130/230/430/530

Classification	Thickness [in./mm]	Grams/ Sq. Ft.	Grams/ Sq. M.	Ounces/ Sq. Ft.	Ounces/ Sq. Yd.	Pounds/ Sq. Yd.	Roll Length [+/-300ft.]	Roll Length [+/-91M.]	Roll Diameter
10 mil	.001 / 0.254	3.5	37.7	0.12	1.11	0.07	1000	305	16-20"
20 mil	.002 / 0.508	7.1	75.9	0.25	2.24	0.14	1000	305	22-25"
30 mil	.003 / 0.762	9.5	102.3	0.34	3.02	0.19	1000*	305*	22-25"
1/2 ounce		14.2	152.6	0.50	4.50	0.28	1000*	305*	24-27"

\*If rolls are over 80" wide, the roll lengths may be approximately half the stated length.

**PRODUCT DESCRIPTION:** Non-woven, continuous strand, glass fiber surfacing veil for use in moderately to highly curved composite mold applications where improved or Class-A surface is required. Highly corrosiveresistant, boron-free "A" glass strands are used. Binder at 7 to 16% by weight with Silane glass additive for improved polymer/glass bond.

**PRODUCT APPEARANCE:** Trimmed rolls on 3" cores. Highly uniform, continuous strand veil. Substantially free of tears, holes, foreign material.
