Release Innovation™

PRODUCT DATA

Chemlease® Chemwax 304

Flange Wax

Description

Chemlease® Chemwax 304 is especially designed for release of polyester parts from the flange/edge areas of polyester molds. It is easy to apply and remains smooth and wet during the molding process.

Application Instructions

Chemlease® Chemwax 304 is applied using conventional procedures. Commonly used methods include wiping on with a soft cotton cloth or sponge; brushing with a clean soft brush; and application with wooden or metal spatulas. Chemlease® Chemwax 304 may be applied to metal and/or plastic edge surfaces.

Safety Data

Material Safety Data Sheets are available for all Chemlease® products and should be consulted prior to use of the product.

Packaging

Chemlease® Chemwax 304 is available in 1-gallon, 5-gallon, and 55-gallon (U.S.) containers.

While the technical information and suggestions for use contained herein are believed to be accurate and reliable, nothing stated in this bulletin is to be taken as a warranty either expressed or implied.
