

Freeman Wood & Plaster Sealer

Description

Freeman Wood & Plaster Sealer is a clear lacquer sanding sealer that may be applied by brush or low-pressure spray. It is specially formulated to seal wood, plaster, sheet wax, MDF, and other porous materials. It is also ideal for sealing wood master models to prepare the surface for plastic duplication.

*Aerosol recommended for use with sheet wax.

Coverage (per gallon)

187 sq. ft. (+/- 33 sq. ft.)

Reduction:

The Wood and Plaster Sealer may be thinned using the 90-1 Fre-Thin Thinner for desired viscosity. However, due to the number of variables that factor into thinning, proportions will need to be dialed in. It is recommended to start at 5%, increasing incrementally should further thinning be required. For best results, do not surpass 20% and it is advisable to increase to 20% only if absolutely necessary.
