

INTRODUCING

Elkem Pad Printing Silicone

Freeman Manufacturing & Supply Co. is proud to offer Elkem's line of Pad Printing Silicone.

These silicones have been developed specifically for the pad printing industry, engineered to surpass current product available in the market today.

Superior Traits

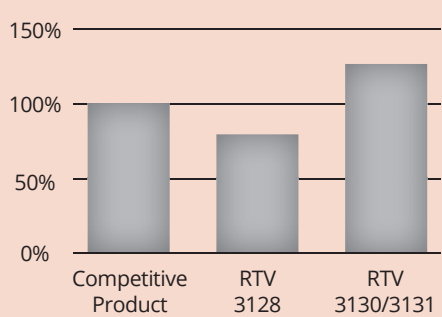

- *High mechanical properties*
- *Excellent thermal stability*
- *Outstanding solvent resistance even in diluted state*
- *Long pad duration*

High Performance

- *Very efficient ink transfer on any substrate*
- *Excellent print performance & easy processing*

Customizable

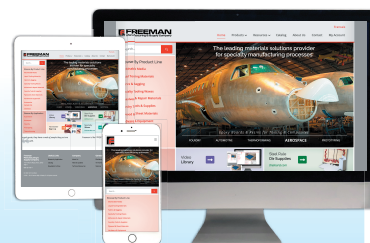

- *High oil dilution capabilities*
- *Pigmentable for color of choice*

Products	Viscosity (Mixed)		Viscosity (Unmixed)		Tear Strength (KN/m)		Pot Life (min.)		Hardness (Shore A)		Additive Color	Features	Pad Duration	Pad Duration Comparison	
RTV 3130	25,000	15,000	23	60	30						Red	Offers excellent print behavior	High	150%	
RTV 3131	25,000	15,000	23	10	30						Translucent	Offers excellent print behavior	High	100%	
RTV 3131 SC	25,000	15,000	23	60	30						Translucent	Customizable	High	50%	
RTV 3132	25,000	4,000	23	15	32						Blue	Excellent print behavior, antistatic	High	0%	
RTV 3128	25,000	8,000	20	60	28						Red	General purpose, food grade	Med.	0%
