

Pad Printing Silicone Rubber

**FREEMAN MANUFACTURING
& SUPPLY COMPANY**

www.FreemanSupply.com

Freeman's Pad Printing Silicone easily creates durable, high-strength print pads with superior print quality. These liquid silicone systems are available in 22-25 Shore A but can be reduced in hardness with our silicone fluid to meet your application needs.

EXCEPTIONAL DURABILITY AND RESISTANCE

- Formulated for consistent performance across thousands of imprints
- High resilience against industrial wear and tear reduces downtime, cost, and replacement frequency
- Withstands exposure to cleaning agents, inks, and other chemicals, ensuring extended pad life

SUPERIOR PRINT QUALITY

- High-precision material maintains print clarity for crisp, accurate prints every time
- Provides excellent definition on fine details for a wide range of surfaces

INK TRANSFER EFFICIENCY

- Optimized for high ink transfer, maximizing coverage with every imprint
- Consistent ink pickup and release across various ink types for versatile printing needs
