TECHSHEARS

"State of the Art" Cutting Shears

DESCRIPTION :

TechShears are the most advanced manual cutting shears available. The cantilever action reduces cutting effort by 50-70% over conventional shears. Blades are replaceable and titanium nitride coated for a super sharp, long lasting edge. The side adjustment screw allows cutting force to be adapted to the thickness of the material. Serrated blades are also available for cutting aramid Kevlar® fabric. **TechShears** are designed for both left and right hand use.

CARE AND USE:

- **TechShears** can be cleaned with shop solvent.
- After cleaning, place a drop of light oil in the moving part hinges and the adjustment screw.
- Replace the blades when cutting performance diminishes.

CAUTION:

Avoid touching the blades – They are extremely sharp and can cause serious injury.

CATALOG POSITION: **MISCELLANEOUS**

As the conditions or methods of use are beyond our control, Airtech International, Inc. does not assume any responsibility for the performance of this material for any particular use. The material is sold "as is". Airtech International, Inc. disclaims, and buyer waives, any and all implied warranties, including without limitation the implied warranties of merchantability and of fitness for particular use.
