

## Dux-Bak Non-Silica Dry Parting

### Description

Dux-Bak Non-Silica Dry Parting can be used to aid in the release of green sand molds and cores in all metal type applications. It is also used as an indicator between the cope and drag parting lines for assurance of a good fit. Dux-Bak can be applied by shaking a parting bag over the pattern until the desired coverage is applied.

The waterproofing benefit of this material will not allow the moisture from molding operations to interfere with parting release characteristics.

### Physical Properties

- Good Release
- Excellent Visibility
- Easily Applied
- Low Waste
- Will typically allow a minimum of 98% passing through a 200 mesh screen.
