

## Freeman Color Tints

### Description

A highly concentrated coloring tint or dye which is available in nine colors for urethane and epoxy resins. Deep colors can be achieved when using between 0.01% and 3% of the polyol side.

For urethanes, mix thoroughly into the Part B or polyol side before combining with Part A. For epoxies, add to the resin side before combining with the hardener.

Be certain to use hand protection with this product. It is highly concentrated and will stain skin and permanently stain objects that it comes in contact with.

Packaged in an easy to use 2 oz squeeze bottle.
