

Shalco Super Vents Core Vents

Description

The Shalco Super Vents were designed to be a solution to common issues often seen with traditional slit and mesh style vents, including clogging, exhaust capacity, and strength.

Key features include:

- A self-cleaning mechanism to reduce clogging and cleaning frequency.
- An opening rate of at least 43% for more effective venting.
- A 0.3mm (0.012") slot width
- A nickel-plated surface for better release properties and rust prevention
- Special joining technology of the head and body to increase durability.
