To Our Customers:

The US EPA has banned the sale of products containing methylene chloride for all consumer uses.

Uses that will continue under the Workplace Chemical Protection Program are highly industrialized and important to national security and the economy and are uses for which EPA received data and other information showing that the workplace safety measures could be achieved.

Additionally, specific uses of methylene chloride required by the National Aeronautics and Space Administration, the Department of Defense, and the Federal Aviation Administration will also continue with strict workplace controls because sufficient reductions in exposure are possible in these highly sophisticated environments, thereby minimizing risks to workers.

Sincerely,

Freeman Manufacturing & Supply Co.
